VAST SELECTION

Thin Stone Veneer is available in a variety of sizes, colors, and thickness suitable for many applications. We can process any color / type of stone, any panel size/ thickness, with any backer for your project.

PROCESS

We control the process from the beginning ensuring the highest quality control. Starting with sourcing the blocks/ slabs from the country of origin to processing the material to your desired specifications. EA-Stone Group can also custom fabricate the stone for your project/ product coupled with metal, wood, glass, etc. for a finished product shipped to your door.

HIGH STABILITY

Stone surfaces are more stable than many other types of surfaces.

NATURAL BEAUTY

Stone has been used in fine architecture for centuries, thanks to it's distinct appearance and unique qualities.

SUSTAINABLE

Compared to traditional stone surfaces, Thin Stone Veneer covers more surface area, consuming less quarried stone.

HARD & DURABLE

EA-Stone Veneer is resistant to: Impact, Abrasion, Extreme Temperatures, and Open Flame.
